## Package Drop Tester

Imagine a product is sitting on a supermarket shelf and a customer grabs it with his hand and it slips by mistake. The product falls on the floor. Will it break ? will it leak ?

Imagine if the retailer is bringing a shipper box (with your products inside) from his warehouse to his store and the box falls. Will your products break / leak / spill ? or will they be able to withstand the fall.

This can be predicted by a simple but helpful, drop test.

### **Types of testers:**

#### **Small Package Drop Tester :**
